REVISED SYLLABUS

FOR THREE YEARS B.Sc. (MAJOR) COURSE IN

SERICULTURE
According to the New Examination Pattern
Part – I, Part- II & Part- III

WITH EFFECT FROM THE SESSION 2016 – 2017
## Revised Syllabus of Sericulture (Major Course)

(w.e.f. the session 2016 -2017)

PART - I

Paper - I

Full Marks – 100

Group – A: General Sericulture 50 Marks

No. of Lectures

1. Sericulture-Definition-Characteristics-Scope 1

2. Origin and history of Sericulture, silk route 2

3. World output of silk, other natural fibres and man made fibres.
Importance of natural fibres vis-à-vis man made fibres – Role of silk fibres amongst natural fibres. 2

4. Silk industry in the World - Silk industry in China, Japan, South Korea, Brazil, Thailand, Uzbekistan, Vietnam and other countries 3

5. Silk industry in India, West Bengal, Jammu & Kashmir, Karnataka, Tamil Nadu, Andhra Pradesh and other states (Mulberry and non-Mulberry Sericulture). Mulberry area Cocoon production, silk production, Number of reeling units (Charka, Cottage, Basin, Filature basin, Handlooms and Powerlooms. 3

6. Prospects and problems of Sericulture, Advantages of silk fibres over other fibres – International demand for silk – constraints in silk production like labour, land, environmental conditions, skill and production cost. 4

7. Organisation of Sericulture industry in India – Government of India – Central Silk Board – State Departments of Sericulture 4

8. Mulberry silkworm and its food plants – Mulberry sericulture – Silkworm races Classification of Mulberry silkworm on the basis of its origin and voltinism. 4

9. Non-mulberry – their food plants. Different species of non-mulberry silkworm. Brief account of:
   a) Tasar food plants
   b) Muga food plants
   c) Eri food plants

Types of cocoon and silk produced by them 5

11. Outline of different reeling machineries- Charka- Cottage basin- Filature basin- Multi end basin---Semiautomatic and Automatic Reeling Machine 4
12. Marketing of silk – Marketing set-up in different States – Silk grading – Brief idea of silk conditioning and testing.
14. Employment Generation in different sectors of Sericulture
15. Seed organization-Significance of seed organization-Maintenance and multiplication of basic stock-Different steps of commercial egg production.

Group – B: Biology of Silkworm and Silkworm rearing Technology 50 Marks

**Silkworm Biology**

2. Life cycle of *Bombyx mori* - morphology of egg, larva, pupa and adult
3. Morphology and anatomy of following organ systems of silkworm  
   a) Digestive including mouth parts  
   b) Reproductive  
   c) Excretory
4. Silk gland-Morphology-Silk Proteins and their significance
5. Moultng-Classification of silkworm according to moultng-Hormonal Control
6. Silk moth Metamorphosis-hormonal control.
7. Nutrition-Nutritional requirement of young age and late age silkworm
8. Growth-Factors influencing silkworm growth and development
<table>
<thead>

</table>
**A. General Sericulture : (Marks 25)**

1. Sericulture maps -  
   a) World map of silk road  
   b) Countries  
   c) India  

2. Organisation set up in India -  
   a) Government of India  
   b) Five traditional states-Karnataka, Andhra Pradesh, Tamil Nadu, West Bengal, Jammu and Kashmir.  

3. Identification and study of sericulture production :  
   a) Cotton and silk yarn types  
   b) Pupae  
   c) Silk waste  
   d) Spun yarn  
   e) Nail yarn  
   f) Other byproducts  

4. Preparation of Histograms on World output :  
   a) of silk and other textile fibre  
   b) World output of silk fibre of different countries  

5. Preparation of line graph on trend of silk yarn and other textile fibre production over a period of 5 years.  

6. Preparation of bar diagram, multiple bar diagram trend of silk yarn and other textile fibre production over a period of 5 years.  

7. Preparation of pie chart on output of different types of silk production in India and on Mulberry silk production in different States.  

8. Preparation of column diagram, frequency polygon, histogram from frequency distribution  

**B. Silkworm Biology : ( Marks 25 )**

9. **Morphology :**  
   a) Mouth parts of silkworm  
   b) External morphology of egg, larva, pupa and moth  
   c) Sex separation of larva, pupa and moth  

10. **Anatomy :**  
    a) Digestives system, silk gland, nervous system, reproductive system of silkworm.  
    b) Reproductive system of male and female moth  

11. Cocoon characters of uni, bi and multivoltine races.  

12. Identification of different non mulberry cocoons  

**Rearing Technology : ( Marks 25 )**

13. Study of a model rearing house  
14. Study of the different types of rearing appliances-their design and uses.  
15. Study of cost and requirements of rearing appliances for 100 dfls.  
17. Preparation and study of various bed disinfectants and their application in Sericulture Industry.  
18. Estimation of total surface area and calculation of requirement of disinfectant solution  
20. Study different types of brushing methods.  
21. Selection of leaves for different instar  
22. Calculation of leaf moisture  
23. Chopping of leaves  
24. Bed cleaning  
25. Identification of molting larvae  
26. Care during moult  
27. Identification of spinning larvae  
28. Studies of different types of mountages and their efficiency  
29. Preparation of harvest report  

**D. Viva – Voce : ( Marks 15 )**  

**E. Laboratory note book : ( Marks 10 )**

Unit – I : Soil Science

1. Soil-Definition of soil- Soil forming factors-soil forming agents.  
   No. of Lectures: 2

2. Classification of Soil  
   No. of Lectures: 2

3. Physical properties of soil
   i) Volume constitution of soil  
   ii) Soil texture – a) Soil separates b) Soil textural Classes  
   iii) Soil Structure- a) Type b)Importance c) Ways to improve soil structures  
   iv) Soil colour  
   v) Soil permeability- a)Soil bulk and particle density b ) soil porosity c) permeability As related to soil texture and structure.  
   vi) Soil air.  
   No. of Lectures: 5

4. Soil Water:  
   i) Importance of water  
   ii) Physical and biological classification of soil water  
   iii) Soil moisture content and their measurement  
   iv) Water requirements of mulberry  
   v) Factors affecting soil water holding capacity including capillary rise and leaching  
   vi) Soil water conservation and management.  
   No. of Lectures: 4

5. Soil organic matter:  
   i) Soil organic and chemical nature of its constituents.  
   ii) Importance of soil organic matter  
   iii) Carbon : Nitrogen ration of organic matter and its significance  
   iv) Soil micro organism : Types role in mineral nutrition.  
   No. of Lectures: 3

6. Mulberry growth and nutrition:  
   i) Elements (nutrients) essential for plant growth and their classification  
   ii) Forms of elements taken up by plants, their absorption and utilization  
   iii) Sources of nutrient elements in the soil  
   iv) Role of essential elements in plant growth  
   v) Deficiencies/ and toxicity  
   No. of Lectures: 3

7. Importance of soil types of India related to mulberry cultivation  
   i) Alluvial soils  
   ii) Black soils  
   iii) Red soils  
   iv) Laterites and lateritic soils  
   No. of Lectures: 3

8. Soil Testing-Soil sampling-Method of soil sampling- Relevant information regarding soil sampling-Precaution-Physical and Chemical Properties of soil- Improvement and reclamation-  
   No. of Lectures: 3
## Unit-II: Biology of Mulberry-25 Marks

<table>

<td>iii) Manures and their applications:</td>
</tr>
<tr>
<td></td>
<td>a) Basic approaches in mulberry cultivation</td>
</tr>
<tr>
<td></td>
<td>b) Natural farming and vermiculture</td>
</tr>
<tr>
<td></td>
<td>d) Biofertilizers: Types, importance, application methods and limitations.</td>
</tr>
</tbody>
</table>

f) Foliar nutrition: Foliar nutrients and commercial formulations, scope and limitations.

iv) Inter-cultivation practice; Purpose, methods, time and frequency.

v) Common weeds of mulberry, their effect on mulberry, productivity and quality and control measures.

vi) Pruning and training objectives: Types and methods of pruning and importance, utility of mulberry pruning in sericulture management practices.

viii) The schedules of package of practices of mulberry cultivation. 
   a) Irrigated gardens 
   b) Rain fed gardens

14. Mulberry Management:

   a) Significance of ‘leaf cocoon ratio’ concept
   b) Measures of the maintenance of high soul productivity
   c) Exclusive mulberry garden for chawki rearing: concept and methods.
   d) Maintenance of mulberry plots in relation to rearing schedules
   e) Requirements, organization and management of labour
   f) Maintenance of farm records and their relevance
   g) Farm implements and machinery

Group – B: Diseases and pests of mulberry & Silkworm

Unit – III: Diseases and pests of Mulberry 25 Marks

1. Concept of plant diseases and importance of plant protection 1
2. Classification of diseases of mulberry 1
3. Influence of biotic and a biotic factors on the incidence of mulberry diseases 
   fungal diseases of mulberry, occurrence, symptoms, epidemiology and control 4
4. Minor control 
   a) Leaf spot 1
   b) Leaf rust 1
   c) Powdery mildew 1
   d) Leaf blight 1
   e) Root rot 1

5. Bacterial - viral ad mycoplasmal diseases of mulberry control measures. 2
6. Root knot nematode diseases of mulberry – its occurrence, symptoms and controls. 2

8. Mineral deficiency symptoms in mulberry reclamation. 3
9. Mulberry pests: Classification, life cycle, symptoms of attack, period of occurrence and types of damage caused by Mealy Bug, Thrips, Whitefly, Bihar hairy caterpillar, jassid and termites. 5
10. Management: Essential component, principles and concepts - physical-
    Mechanical, photo tropical and cultural.
    Chemical - types of insecticides, forms and formulations. Pesticides
    Calculations and useful formulae. Application techniques and wetting periods.
    Biological – principles and concept, Useful natural enemies of pests of mulberry.  

Unit – IV : Diseases and pests of Silkworm  25 Marks

11. Introduction and classification of different types of silkworm diseases
    Influence of environment and Nutrition on the incidence of diseases.  

12. protozoon disease and pebrino - symptomology, structure and life history of
    Nosema bombycis- sources and mode of infection - prevention and control.  

13. Bacterial diseases flacherie - symptoms of different types flacherie disease -
    causative agents, factors influencing Flacherie, sources and mode of infection -
    prevention and control.  

14. Viral diseases- grasserie- symptoms of different types viral diseases, causative
    agents, structure and life cycle of NPV, CPV - Kenchu & DNV viruses, sources
    and mode of infection, protection and control.  

15. Fungal diseases- Muscardine-symptoms of different types of fungal diseases - causative
    agents, structure and life cycle of Beauvaria , mode of infection, prevention
    and control.  

16. Aspergillus disease - Symptoms, causative agents, structure and life cycle of Aspergillus
    Sp. , mode of infection, prevention and control.  

17. General account of disinfection and relative efficiencies of different disinfectants.  

18. Silkworm pests : Life cycle of tachinid fly -Nature of damage, alternate host and other
    important behaviors in relation to mating, oviposition and flight, prevention, chemical
    control (ovicidal and chemical attractants), useful natural enemies of Tachinid flies,
    integrated management against tachinid fly, dermestid beetles : biology, prevention
    and control . Nature of damage, Prevention and control of other pests like ants,
    rodents and lizards.  

19. Life cycle and methods of important natural enemies of pests of silkworm and mulberry.
    New strategies, use of kairomones, pheromones, growth regulators, autocidal methods.
    Necessity and concept of IPM with case studies against : Tachinid fly and Meal y bug.  

10
Paper - IV (Practical)  
Full Marks – 100

Unit – I : Soil Science  20 Marks
1. Study of different types of soil
2. Soil Sampling
3. Determination of saturation capacity of soil
4. Soil analysis for pH and electrical conductivity
5. Determination of organic carbon by Walky Black Method
6. Determination of Soil Moisture from the given soil sample
7. Determination of soil texture from the given soil sample.

Unit – II : Biology of Mulberry  20 Marks
1. Morphology and Identification features of popular Mulberry varieties of West Bengal
2. Preparation of Nursery Beds.
3. Preparation, planting and raising of cuttings in nursery bed.
4. Preparation of different types of grafting
5. Different methods of Planting
6. Calculation regarding irrigation
7. Identification of different types of fertilizers, Calculation of doses
8. Identification of common weeds of mulberry and weeding
10. Farm implants and machinery
11. Preparation of flow chart of Annual schedules of operations for 1 ha. Of Irrigated mulberry and also of rain fed mulberry

Unit – III : Disease of Mulberry & Silkworm  20 Marks
1. Identification of Powdery mildew disease of mulberry
2. Identification of Leaf spot disease of mulberry.
3. Identification of leaf rust disease of mulberry.
4. Identification of Root knot disease of mulberry.
5. Identification of Root rot disease of mulberry.
6. Formulation of different types of fungicides.
8. Identification and preparation of Permanent slide of the Pathogen- *Nosema bombycis.*
9. Identification and preparation of Permanent slide of the Pathogen- *Bombyx mori* Nuclear Polyhedrosis Virus (BmNPV)
10. Identification and detection of a pathogen causing white muscardine disease in silkworm .
11. Identification of Common Bacterial Disease of Silkworm.
14. Mother Moth Examination.

Unit- IV : Pests of Mulberry & Silkworm  20 Marks
1. Identification of Mealy bug infested leaf of mulberry.
2. Identification of Thrips infested leaf of Mulberry.
3. Identification of White fly infested leaf of Mulberry.
4. Identification of Bihar Hairy caterpillar infested leaf of mulberry.
5. Identification of developmental stages of pests of mulberry with special reference to mealy bug , whitefly and thrips.
6. Formulation of Insecticides.
8. Identification of developmental stages of pest of Uzi fly.

Unit- V :  20 Marks
1. Submission of Laboratory note book  5
2. Viva- vice  10
3. Field report  05

**PAPER-VIII**

Entrepreneurship Development
PART -III

Paper - V

Group – A : Genetics and Breeding of Mulberry & Silkworm

I. Genetics and Breeding of Mulberry :

1. Genetic variability in mulberry – sources of variability
   Wilde species – hybrids. Popular varieties of India -
   chromosomal variations.  
2. Germ plasma conservation – significance and methods.
3. General information to plant breeding – objectives of mulberry
   breeding – parameters associated with growth, yield and quality
   of mulberry.
4. Selection – characters and importance of a) pure line selection
   b) clonal selection c) mass selection
5. Methods of plant breeding – a) Hybridization b) Polyploidy
   c) Mutation
7. Tissue culture – meristem, callus, auther, pollen, endosperm, encapsulation of shoot buds and
   cryopreservation of germ /
8. Seed organization – types of seed, nucleus seed, foundation seed, certified seed, seed
   testing, certification – seed multiplication and distribution, concept of seed farms.

II. Genetics & Breeding of Silkworm :

Silkworm genetics :

1. Silkworm is a laboratory tool for genetic studies
2. Mendel’s principles – Dominance, Law of Independent assortment and segregation,
   Test cross and back cross.
3. Inheritance of cocoon colour, larval markings, E -alleles, multiple alleles.
4. Inheritance of voltinism, material inheritance, inheritance of
   moultinism, environmental influence and hormonal control.
5. Sex determination, sex linked and sex limited traits their special
   significance in sericulture.
6. Chromosome number and nature of chromosomes in different
   types of silkworm.
8. Prospects of Biotechnology to improve silk production – preliminary idea of
Genetic Engineering-Preliminary idea of Restriction Endonuclease and Plasmid –Steps in Gene Cloning. 3

10. Parameters relevant to silk production – qualitative and quantitative characters and its used in breed selection. 2

11. Breeding of silkworm – prerequisites, aims and objectives - Types of Breeding- Methods- present status of silkworm breeding in India. Problems, priorities and goals. 2

12. Selection methods – individual and family selection – indirect, stabilizing and directional selection. 2

13. Inbreeding and out breeding- advantages and disadvantages -effects of inbreeding-consequences of homozygosity. 2

14. Development of auto sexing breed for egg colour, larval marking and cocoon colour-its significance in sericulture. 2

15. Heterosis – theoretical basis- utilization of heterosis in sericulture – hybrid vigour in different crossing system - hybrid vigour and environment - combining ability tests. 2

16. Maintenance of races, breeds and strains. 1

Group – B : Silkworm seed Technology  Marks 50

1. Morphology of silkworm egg :
   Size, shape, weight and colour of egg, structure of egg -its constituents 3

2. Embryology of silkworm egg :
   Characteristics of different stages – critical stages of development. 3

3. Seed organization :
   Significance ; maintenance of parental stock and multiplication. 2
   a) Seed areas : identification – concept of selected seed rearers and villages 2
   b) Seed legislation : acts, rules and regulation. 2
   c) Monitoring of seed crop : screening of egg shells, larval, faecal matters for disease. Disinfection and maintenance of hygiene during rearing. 2
   d) Seed cocoon market – pupal examination – certification of seed cocoon lots- price fixation for seed cocoons. 2

4. Commercial Egg Production
   a) Plan of a model grainage building 1
   b) Disinfection and hygiene in seed production units. 1
   c) Procurement and transportation of seed cocoon 1
d) Sorting and preservation of seed cocoon - role of temperature, humidity, light and air on seed cocoon preservation. 3

e) Early test for detection of patria disease papal gut examination and forced eclosion test. 2

f) Sex separation in seed production 1

g) Synchronizations of emergence – synchronized brushing of roles in villages- Old storing of cocoons/pupal and moths 3

h) Eclosion or emergence of moth - manipulating of photo - periodic condition - collection of male and female moth – influence of light or emergence. 2

i) Pairing or coupling of moths - rejection weak and deformed moths, duration of pairing – potency of male moths – number of pairing – depairing and decoupling. 2

j) Ovipositor – ideal condition for ovipositor – calculation of age of eggs. 1

k) Mother moth examination – individual and mass method – green and dry moth – identification of patria spores – surface sterilization of eggs. 2

5. Handling and Preservation of Silkworm eggs.

a) Handling of multivoltine eggs – ideal embryonic stages for cold storing. 1

b) Handling bivoltine egg – methods for early hatching – hot and cold acid treatment – advantages – relationship between temperature and specific gravity of acid – ideal age of eggs for acid treatment – precautions during acid treated eggs. 3

c) Preservation of bivoltine egg – short term chilling and long term chilling – hibernation schedules – 4 months, 6 months and 10 months hibernation schedules – importance of intermediate temperature- relationship between aestivation period and duration of cold stage. 3

6. Preparation of loose eggs – advantages and disadvantages - handling of loose eggs. 1

7. Economics of seed production - Cost control in a commercial grainage 1

8. Protection measures on seed production. 1

Paper – VI

Group – A : Silk Technology  Marks 50

1. Introduction to textile fibres – Natural fibres vs man made fibres. 2

2. Physical and chemical properties of silk – uses of silk. 2

3. Raw materials for silk reeling - selection of cocoon for reeling, assessment of renditta, raw material valuation Procedures of cocoon procurement, transportation of cocoon 3

4. Processing of cocoon:
   a) Stifling-definition-objective-different methods-sundrying-black cloth sundrying, steam stifling hot air drying, Mshuakothi. 3
   b) Sorting- separation of defective cocoons. 1
c) Conditioning and preservation -methods of preservation of stifled cocoons. 3
d) Cocoon boiling/cooking -definition and objective, different methods - open pan, three pan and six pan cooking/boiling methods. 3
e) Cocoon brushing-methods-manual and mechanical building. 3

5. Reeling of cocoon
   Objective – different types of reeling machineries comparative account of reeling in different reeling machineries-study of yarn passage in different reeling machineries. 4
6. Re-reeling and packing.
   Objective-importance of rereeling; book making and bail making; factors Influencing the quality of fibre. 3
7. Quality of water required for silk reeling - effects of water in silk reeling - Japanese standards for silk reeling water - corrective measures. 3
8. Quality control in silk reeling and its necessity. 2
9. Cocoon testing and grading – objectives-different relevant methods adopted in India. 3
10. Raw silk testing and grading -different tests for raw silk quality measurement, methods of testing, condition for testing and grading. 3
11. Cocoon market and silk exchange - a general account. 2
12. Chemical processing of silk yarns and fabrics -degumming, bleaching and dying. 3
14. Silk testing-winding, warping and weaving - a general account; powerloom and handloom weaving. 2
15. Numerical Calculation regarding production of silk in filature. 1

Group – B:

I. Non-mulberry Sericulture Marks 25

1. Type of non-mulberry silkworm and their distribution in India and other countries. Prospects and problems of Non Mulberry Sericulture. 1
2. Non-mulberry Sericulture and its relevance to social forestry; Industrialization vs non-mulberry sericulture in India-Existing forest potential and their relevance to non -mulberry Sericulture and employment potential. 2
3. Primary and secondary host plants of Tasar, Eri and Muga silkworm. 2
4. Propagation of primary food plants of Tasar, Eri and Muga silkworm -Ecoraces of Tasar, Eri and Muga silkworms. - 3
5. Morphology of egg, larva, pu pa and moth of various non - mulberry silkworm – silk glands of Tasar, Eri and Muga silkworm. - 3
6. Rearing : Ecological conditions that influence rearing of non - mulberry silkworms – Improved rearing methods for young st age and late stage silkworms. 3
7. Muga culture and its endemic nature to Assam State. 1
   General account of common diseases of host plants.
10. Pests and predators of non- mulberry silkworms- their bionomics, seasonal abundance, nature and extent of damage of their various pests and their control.
11. Reeling : Reeling of cocoons -basis difference between mulberry and non - mulberry Silks-different reeling machines- Traditional and modern methods of reeling. Spinning- principles of spinning, different methods and different types of spun silk.

II. **Sericulture Extension, Organization and management**

1. **Extension**:
   Extension education, Definition –meaning-origin and growth principles and attributes of extension education- community development programmees -role of extension in rural developments-sericulture as a tool for rural development.

2. **Extension education methods and communications**:

3. **Diffusion of innovations in Sericulture**:
   Concept of diffusion and adoption –lab to land programmed sources of information and adoption stages. Attributes of innovations and their impact on technology adoption.

4. **leadership and motivation**:
   importance of leadership in sericulture -Identification of local leaders -importance of motivation in sericulture-key motivation facts in sericulture.

5. **Marketing management**:
   Sericulture marketing organization – cocoon market and silk exchange - regulated and non regulated market – stabilization of price in cocoon market and silk exchange.

6. **Sericulture co-operative**:
   Definition , characters and types of cooperative – principles of cooperative- advantages of cooperative-present status of co-operatives and sericulture - financing agencies in sericulture – short term, mid term and long term financing.

7. **Feed back system**:
   Survey – types, merits and limitations Selection of data evaluation.

8. **Project formulation/and evaluation**
   Definition and characterization of a project – project formulation - Evaluation/appraisal of a project – project analysis.
PAPER – VII (Practical)

Group – A :

Genetics and Breeding of Mulberry

2. Determination of Moisture Retention percentage and moisture retention capacity of mulberry leaf.
4. Estimation of chlorophyll from unknown sample.
5. Estimation of soluble sugar from given plant extract.
6. Estimation of Leaf-Shoot and Leaf-Petiole ratio from the given leaf sample.
7. Estimation of carotenoid from unknown sample.

Genetics & Breeding of Silkworm

1. Evaluation of Heterosis.
2. Chisquare Test.
5. Identification of different types of cocoons.

Silkworm Seed Technology

1. Plan of grain age building and grain age equipments –visit. to the commercial grainage.
2. maintenance of records in grainage.
3. Visit to the seed cocoon markets, commercial grainage, multivoltine and bivoltine.
10. Preservation of eggs-short term and ordinary chilling - hibernation schedules 3,4,6 and 10 months.
Silk Technology.
1.) Sort out the good cocoons and defective cocoons in the supplied cocoons lot and determine good and
defective cocoons percentage.
2.) Single cocoon reeling-determination of average filament length and average denier (size).
3.) Calculate S.R percentage of the supplied cocoon sample (green weight basis). Also calculate the
estimated renditta.
4.) Calculate the degree of cooking, dropping percentage and grouping percentage of the supplied cocoon
lot.
5.) Calculate the average-size, maximum size deviation, standard size deviation and CV% from the supplied
6.) Degumming of raw silk yarn and silk waste by soap and soda method and estimation of degumming.
7.) Water analysis – pH Total hardness, Total alkalinity

Non – mulberry Sericulture.
1. Identification of major food plants of non mulberry silkworms.
2. Identification of different stages of Tasar Silk moth
3. Identification of different stages of Eri silk moth.
4. Identification of different stages of muga silk moth.
5. Identification of different cocoons produced by non mulberry silk worm.

Group – B :

On –the- Job Training Marks 50

Every candidate shall be required to undertake on -the-Job Training for a period of about 8(eight) week s at the
end of the second years of study. The purpose of the on -the-Job Training is to expose the students to the
different aspects of sericulture in real situation. Following are the probable sites for on -the-Job training :-

- Silkworm seed production cent er/Central Silk Board, Berhampore/Department of sericulture, Govt. of W.B.

- Central sericulture Research and training Institute, Central Silk Board, Berhampore.

- Any Sericulture Firm/Technical Service Centres (Sericulture etc.)

One faculty member of the colleges will maintain liason with the organization implanting the training. The
candidate shall be under administrative control of the organization regarding site of work and duty hours etc.

Every candidate shall be required to maintain a daily diary of his attendance and work done/experience
acquired during the training. The head of the organization/ s will furnish a confidential report regarding
attendance and an assessment of the performance in respect of every student to the principal of the college
concerned on completion of the training which will be taken into account at the time of final evaluat ion.

The candidate shall have to submit two copies of bound and typed/neatly handwritten report on the training
undertaken by him/her in the form of a ……. Along with a certificate of the guide from the college duly
Endorsed by the Course. Co -ordinator and principal of the college for evaluation.
The report shall have to be submitted to the college concerned at least seven days before the commencement of
the University examination which will be jointly evaluated by the internal and external examiners.
PAPER-VIII

Full Marks - 100

ENTREPRENEURSHIP DEVELOPMENT

[ Common paper for Three-Year B.A./B.Sc./B.Com. (Major) Degree Course subjects.]
Six Questions to be answered taking three from each group.

Group A

50 Marks

No. of periods.

1. ENTREPRENEURSHIP BUILDING:

b) Need, Scope and Characteristics of Entrepreneurship, Special Schemes for Technical Entrepreneurs, STED.

c) Social responsibility and business ethics.

d) Environmental Awareness.

Total: 12

SOURCE OF FACULTY:

i) In house experts and faculty members of the College.

ii) Director, Cottage & Small Scale Industries, W.B., New Secretariat Building (9th floor), 1, Kiron Sankar Roy Road, Calcutta – 700 001.

iii) SISI, Calcutta, 111 & 112, B.T. Road, Calcutta – 35.

iv) GM / DIC of respective District.

v) GNCCI / NEBCON.

vi) Any successful Entrepreneur of the locality.

vii) IIM, Calcutta.

viii) Experts from Bengal Engineering & Science University.

ix) IISWBM, Calcutta.
2. **TECHNOLOGY MANAGEMENT:**

**SOURCE OF FACULTY :**

i) In house experts and faculty members of the College.  
ii) IIM, Calcutta.  
iii) Deptt. of Business Management, C.U.  
iv) Experts from Bengal Engineering & Science University  
v) SISI, Calcutta.  
vi) GM/DIC of respective district.  
vii) IISWBM
3. **MONITORING & FOLLOWUP:**

   a) Sickness in small scale industries and their remedial measures.  
   b) Coping with uncertainties and managing the situation.

   Total: 2

**SOURCE OF FACULTY:**

   i) In house experts and faculty members of the College.  
   ii) Directorate of Cottage & Small Scale Industries, W.B.  
   iii) Experts from Bengal Engineering & Science University  
   iv) Experts from Jadavpur University.

4. **DATA BASE MANAGEMENT:**

   a) Books of accounts, financial statements.  
   b) Creation of data base/Management Information System (MIS)

   Total: 4

**SOURCE OF FACULTY:**

   i) In house experts and faculty members of the College.  
   ii) Experts from Bengal Engineering & Science University  
   iii) Experts from Jadavpur University.  
   iv) IIM, Calcutta.  
   v) Business Management Deptt, C.U.  
   vi) IISWBM, Calcutta.

5. **STATUTORY PROVISION:**

   a) Licensing, registration – Municipal bye laws and Insurance coverage.  
   b) Important provisions of factory Act, Sales of goods Act, partnership Act.  
   c) Pollution control & Environmental Act.  
   d) Income Tax, Sales Tax and Excise Rules.

   Total: 5

**SOURCE OF FACULTY:**

   i) Faculty with Industrial Relation Management / Experience background.  
   ii) Tax Practitioner / Lawyer.  
   iii) Member from WBPCB, Calcutta.

6. **KNOWLEDGE INPUT:**

   a) Industrial and economic policy declared by Govt. from time to time.
SOURCE OF FACULTY:

i) Directorate of Cottage & Small Scale Industries, W.B.
ii) SISI, Calcutta.

N.B.: The students shall be required to visit to linked institutions & promotional agencies, like Commercial banks, WBFC, SISI, DIG, Commercial Tax Offices, WBPCB & some testing centers for getting practical exposure.

Suggested Reading Material:

8. Department of Industrial Development: Incentives & Concessions for Setting up Industries in Backward Areas, Deptt. of Industrial Development, Govt. of India, New Delhi.
10. Entrepreneurship Development Institute of India: A handbook for New Entrepreneurs (with special reference to S & T group), Entrepreneurship Development Institute of India.
11. Philip Kotler Publisher: Marketing Management, Prentice Hall of India.
